

## SIMPLICITE POLYDIP COLOR DEMO

### STEP 1:

Prep the natural nail. Apply a tip if an extension is desired. Apply **Simplicite Prep** to all 10 nails. Then apply **Simplicite Bond** to all 10 nails to ensure a strong bonded application.

### STEP 2:

Apply a thin coat of **Simplicite PolyBase** to the natural nail and tip of all 5 nails and cure in the **NSI Dual Cure Lamp**. LED for 30 seconds or UV for 2 minutes. Repeat on the other hand.

### STEP 3:

Apply a thin coat of **Simplicite PolyBase** to the natural nail and tip of all 5 nails. Slide and glide evenly into the **Simplicite Powder Color** of your choice, at a 45 degree angle. Cure in the **NSI Dual Cure Lamp**. LED for 30 seconds or UV for 2 minutes. Repeat on the other hand.

### STEP 4:

Brush off excess powder using your **Plush Brush**. Apply a second thin coat of **Simplicite PolyBase** to the natural nail and tip of all 5 nails. Slide and glide evenly into the **Simplicite Powder Color** of your choice, at a 45 degree angle leaving a margin at the cuticle line to prevent bulk. (Apex: If you need to create a higher apex, brush on the **Smplicitc Polybase** and slide and glide evenly at a 45 degree angle into the **Simplicite Clear powder**, 2/3rd of the length of the nail to create an apex). Cure in the **NSI Dual Cure Lamp** LED for 30 seconds or UV for 2 minutes. Repeat on the other hand.

### STEP 5:

Brush off excess powder using your **Plush Brush**. Apply a layer of **Simplicite Seal**. Cure in the **NSI Dual Cure Lamp**, LED for 30 seconds or UV 2 minute before you refine file. Repeat on the other hand. Refine file using your **180/240 Endurance Grit file**. Finish with a layer of **Simplicite Seal** on all 5 nails. Cure in the **NSI Dual Cure Lamp LED** for 30 seconds or UV for 2 minutes. Repeat on the other hand. Using a lint free wipe, remove tacky disbursement layer with **Cleanse**. Apply **Nurture Oil** to cuticle area and massage.
